

ViceVersa

Summary

1. [Used Technologies](#)
2. [Installation instructions](#)

Used Technologies

Functional Aspect

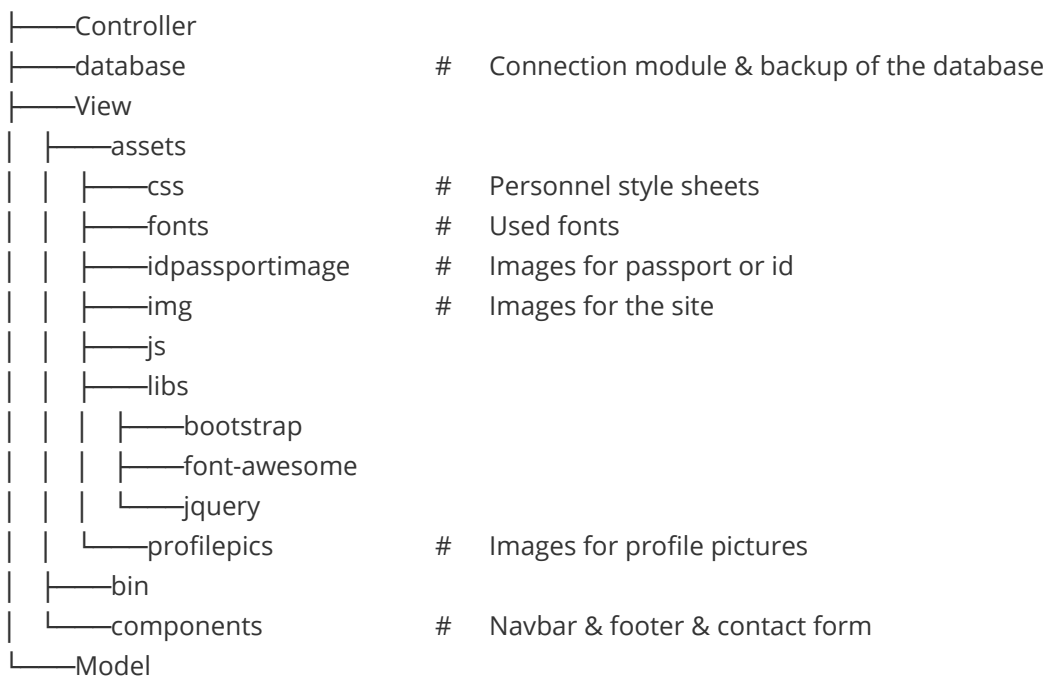

This site is coded entirely in PHP 5.2 et follows the pattern MVC and the database used is MYSQL.

Visual Aspect

The design is principally based on the [Bootstrap3](#) framework of Twitter and some of the components are written using personal style sheet.

For the icons we used those of [Font-Awesome](#).

Arborescence

Installation Instructions

1. Import MYSQL database
 - o Create a table in PhpMyAdmin
 - o Click on the tab Import
 - o Select the file "backup.sql"
 - o Valide the import

2. Modify the login of the database

- Open the file ./database/mysql_connect.inc.php
- Edit the lines :

```
$db_server = ""  
$db_name = ""  
$db_user = ""  
$db_passwd = ""
```

3. The installation is finished !
